

# Updates

# Blockers

- No blockers yet

# Milestones Achieved

- Reflowed 4(2 fully, 2 half) PyCubed boards for software testing
- Preliminary block diagram developed
- Discarded proposed TPU usage

# Looking ahead

- Finalize camera board architecture and payload interface
- Solar panel power generation test board
- Reflow Argus-1 battery board for dev
- Camera Capture Board design by Monday
- GPU power and performance characterization
- Battery board design finished
- RP2040 dev board finished

# Interfaces

- Vision*: Camera Requirements
- Mechanical*: Solar cell layout/orientation
- GNC*: Determine sensor requirements (GPS/Sun Sensor/IMU/etc.), Actuator Requirements
- Comms/Ops*: Radio selection
